- **Capital Region Water**

Capital Region Water (CRW) is the authority that owns and operates the collection system in Harrisburg. It is under a partial CD that solved the city of Harrisburg's CWA liability, and resulted in transfer of control of the collection system from the city to CRW. The PCD requires that CRW implement the nine minimum controls for combined systems and develop a revised LTCP. EPA and PADEP disapproved the LTCP as insufficient. On September 10, 2019, EPA met with CRW to discuss CRW's response to EPA comments. CRW focused on its financial capability and did not address many of EPA's technical questions and comments. The parties scheduled a meeting in mid-October to focus on resolving additional issues.
